

Sandia Group, Inc.
A New Mexico Corporation

March 3, 2008

Sandia Group is proud to add Aqua Bath Company, Inc., a Tennessee based company, to our quality line of products represented in New Mexico and El Paso, TX. Aqua Bath uses a cast acrylic which is a high-performance material for tubs and showers. The durable, nonporous, solid surface is highly resistant to scum, mildew and stains, making it easy to clean and maintain. Warm to the touch, acrylic absorbs impacts that could chip other materials.

Aqua Bath Company is proud to offer the following:

- The authority on ADA-compliant bath ware
- Manufacturer of only acrylic based products
- Uses thicker acrylic sheet than industry standard thus providing longer life
- Fast and reliable information regarding ADA compliance or accessibility
- Manufactures products to meet the owners needs
- Leader in innovative products
- Patented trench drain system
- Water retention strip
- Ability to pre-pipe shower valves and piping
- Weighted shower curtains available
- Uses only US made 304SS for all grab bars
- Ten-year warranty on all ADA and accessible showers against manufacturing defects
- Five-year warranty on all residential units against manufacturing defects

Between their sales, engineering and supervisory staff, Aqua Bath has more than 150 years experience building acrylic tubs and showers. This experience allows them to be flexible enough to produce units to meet your special needs, which may involve relocation of drain, modification of the width and depth, or changes involving the seat or soap dish and the ability to provide an engineering cut sheet for those changes.

Whether your question is on accessibility or ADA, Aqua Bath can provide current information to assist you when making those decisions. Please feel free to visit their web site. www.aquabath.com.

Your Sandia Group Account Manager will come see you soon to talk about opportunities with this great product group.
